

# Austin Humane Society

## Website Redesign

*Megan, Rio, Grady & Lauren*

64,670+

animals rescued in  
just 5 years

**55%** of all page views get less than **15 seconds** of attention.

- Confusing **Navigation** and **Page** Layout
- **Wordiness**
- Too Much **Content**

- Simplify **Navigation** and Page Layout
- Less Words, More **Imagery**
- **Consolidate** Content

*“For Austinites to be encouraged to foster, adopt and donate to Austin Humane Society, they need to **feel a connection to the organization** and be able to navigate the website to **find the information they need easily.**”*

# TARGET USERS

Mid-30's | Great Job | Married | House

Responsible | Pretty Tech-Savvy

Outdoorsy | Animal-lovers

Not a lot of time to waste

70.3%

Of respondents said they would search for a pet to **adopt or foster** online

70.5%

Of respondents said they would find **volunteer** opportunities online

72.7%

Of respondents said they would **donate** to a shelter online

Emily and Ryan just got married and want to get a dog! However, neither of them had a pet growing up and they want to foster to see if they are ready for the responsibility.

Emily goes to the AHS website, sees they are overflowing with dogs right now! She fills out an application to foster Wayne, a 4 year old yellow lab mix.

After 4 weeks, Emily and Ryan love Wayne so much they decide to adopt him!

Because their experience with the Austin Humane Society was so great, they decide to go on the website to donate and fill out a success story.

Emily shares her story and donation on her social media to encourage her friends to become involved with the AHS as well.

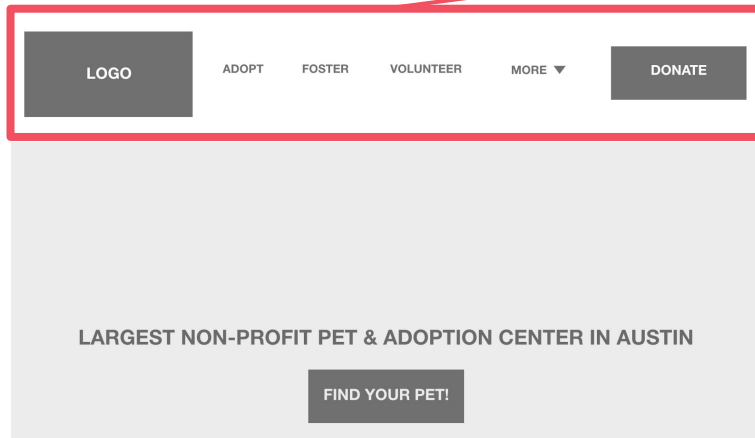

Emily, Ryan and Wayne live happily ever after!

“Their website matches their brand. I like their logo, it's cute and simple.”

# User Flow

[ Clickable Prototypes ]

# Future Development

- More images from the stakeholder, less stock photos
- Building out other user flows such as contact us, sponsoring, and events
- Implementing a bottom tab bar for mobile navigation

# Lessons Learned

- Don't start with colors
- Test as much as possible at each iteration

# Questions?

We're all ears...
